What do I have to do on site?

1

You prepare

A level base, and power and water brought to the spot.

2

We deliver

The house arrives finished, by truck, and is set in place.

3

You connect

Power and water to the pre-installed connection points. No electrician or plumber has to work inside the house.

4

Ready

Switch on. It is ready to use.

Who you buy from

Customers in the EU buy from Limometal Europe, our company in Croatia: an EU seller, so there is no import procedure on your side. Customers outside the EU buy directly from Limometal d.o.o. in Bosnia and Herzegovina, where the LM 26 is made. Either way, your quote states the full price for your country, including transport and taxes.

For camps and investors

Identical units, made in series in our own factory. Tell us how many you need and where: the quote form has a field for the number of units, and you receive one quote for the whole project.
